November 21, 2003

Subject: Letter of Recommendation for Mr. Edward Suyer

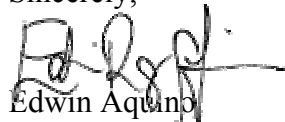

To Whom It May Concern:

Edward worked under my supervision as a Senior Web Developer/Consultant from September 2, 2002, until November 21, 2003. His responsibilities included designing and developing new web applications, database development, maintaining the corporate intranet, and problem solving. During the course of his contract, Edward proved himself to be an able consultant, a hard worker, and a talented programmer.

I was quite impressed by Edwards' ability to complete all work assigned to him on time, if not before it was due. His requirements analysis was always thorough and comprehensive, and his design documentation always accurate. We normally assign two to three major projects per year to our senior developers, but Edwards' talents prompted us to assign him more work than the norm. Edwards' ability for programming complex logic and his command of programming languages is exceptional. His outstanding inter-personal and communication skills made the jobs of the people working with him easier.

Overall, Edward is a very conscientious and able consultant. I strongly recommend Edward for any senior-level developer/programmer position. If you would like to speak to me about Edward's skills, talents, and work habits, feel free to call me at (760) 212-5112.

Sincerely,

Edwin Aquino
